# HM568 Fanless System for i3/i5/i7 CPU Works under 45°C environment

## It's a convertible fanless system!

- ◆ Can be easily converted to a removable HD system
- ◆ Can be easily convert to a PCI-E / PCI Slot system
- ◆ Can be easily transformed to another system for a different project for verity motherboards
- \*Above function just replace with different BASE and add necessary parts
- ◆ Can be converted to a 12V battery Car PC System by adding a Car PC power UN3012
- ◆ Can be converted to a 24V battery Car PC System by adding a Car PC Power UN3024

This Fanless case can handle CPU + Chipset < 50W

Example: QM57 + i3-370M (35W) + 2G DDR3. The Top Cover Heat Sink temperature will be about 47°C when CPU is running at 100%. (Testing temperature is 25°C)
